

Ready to Take Your Next Step?

Our growing and dynamic team is searching for an experienced

Technical Business Analyst

Great Britain

Do you have a passion for solving business problems through data analysis and the application of new and innovative technologies? Do you have drive, the ability to take ownership, work independently and communicate effectively?

Great, then we would like to hear from you!

WHO WE ARE

We are an experienced and passionate team of BI consultants assisting companies primarily in the Retail and Finance / Insurance industries.

Our expertise helps companies to plan, develop and manage their BI solutions and to design and implement their data architecture so as to derive maximum value from their data and make informed business decisions.

We are a growing international company. Customer satisfaction and team culture are equally important to us so we are looking for team members who are driven, engaged, can work independently, and have great communication skills.

WHAT WE OFFER

We are offering the opportunity to work for a dynamic start-up on challenging projects with leading companies. You will be an integral part of our team and you will have a great opportunity to grow with it. The role will equip you with a broad range of skills and experience across different industries and the opportunity to take ownership of entire projects. We will encourage you to apply the industry knowledge you have gained from your prior experience.

THE ROLE

Your responsibilities in the role will include the following:

- Examine companies' existing business models, processes, and dataflows. Identify opportunities to streamline and improve.
- Elicit and document business requirements for data architecture and BI solutions.
- Develop and implement accurate and efficient BI and reporting endpoints.
- Gain additional insight from underlying data and share findings with key stakeholders.
- Design a BI solution and technical landscape that meet business needs.
- Evaluate new opportunities and technologies, assess feasibility and present findings as convincing business cases.
- Present opportunities and solutions to the client.
- Support business process optimisation efforts to improve data capture, data processing and data quality.
- Take ownership of issues and work closely with key stakeholders to resolve them.
- Create documentation and provide end-user training.

YOUR SKILLS

- Advanced knowledge of, and practical experience of using, SQL.
- Experience as technical Business Analyst or solutions architect in retail, banking, insurance, or other major industry.
- Knowledge of or experience in data integration projects (ETL, APIs).
- Understanding of database concepts (e.g. data lake, cloud technology).
- Certification or comparable experience (2y+) in visualisation/dashboard solutions, e.g. MS Power BI, TIBCO Spotfire, Tableau, Microstrategy, SAP Business Objects.
- Understanding of all stages in a project lifecycle.
- Familiarity with analytical methods, techniques, and tools.
- A true team player with integrity; a reliable go-getter with a strong work ethic.
- Ability to work on new projects independently.
- Drive and passion for analytics, data and problem solving.
- Entrepreneurial and forward-thinking approach to strategic and tactical issues.
- Excellent stakeholder management, presentation, and communication skills.
- Interest in new technologies and ways of working.
- Authorisation to work in the UK.
